

# the proposal

## *how it works*

proposing has got to be one of the most exciting, nerve-racking moments of your life. you want it to be perfect. and we want to make sure it's captured. if you're unsure on the exact location but know the general vibe, just let us know. we'll help scout and advise on blocking and light to make sure the moment is picture perfect (it will be no matter what!).

you have us for 1.5 hours with the option to add time if needed. once you're booked in, we'll walk through your plans, advise on exact timing, and let you know if we think you're going to need a few extra minutes. don't worry about a thing – we know this is a big moment and we're always happy to run-through the proposal with you in person to keep those nerves under control.

after you've had your magic moment, you and your love are going to be sitting on cloud nine. it's the perfect time for a couple's shoot. we'll capture the smiles, the sparkle, and the full scene. and in case you were wondering, yes, we'll bring the drone.

photo + video packages begin at \$1000
